SUMMARY

Systems Engineering student (9th semester, GPA 4.5/5.0) and full-stack developer with experience leading software projects for public-sector clients and building generative-AI solutions with LLMs and multi-agent systems. Passionate about detail, product design, and the intersection of software engineering and artificial intelligence. Bilingual (Spanish / English).

EDUCATION

Universidad del Cauca <i>B.Sc. in Systems Engineering</i> GPA: 4.5 / 5.0 • Currently in 9th semester	Aug. 2022 – Jun. 2027 (expected) Popayán, Colombia
--	---

HONORS & AFFILIATIONS

Dean's List Scholarship (Matrícula de Honor) — Universidad del Cauca Awarded three times for outstanding academic performance.	2023 – 2026
First Place — “Innovation in Action” category First Academic Projects Fair & 4th Alumni Meeting, Systems Engineering Program — Universidad del Cauca.	Apr. 2026
Speaker — “Dementia-Level Classification on MRI Images with Deep Learning” Poster and paper presented at the First Academic Projects Fair, Universidad del Cauca.	Apr. 2026
Speaker — “Bayesian Optimization of a CNN for P-Wave Detection” Poster presented at the 5th <i>Ciencia al Parque</i> Meeting, Cauca Research Board.	Dec. 2025
Active Member — Data Science Research Group Universidad del Cauca. Participation in research projects and academic events.	2025 – Present
Active Member — IEEE Student Branch, Universidad del Cauca Support in organizing academic and technical events.	2025 – Present

FEATURED PROJECTS

Vigía Cauca — Team Lead & Full-Stack Developer
Web platform for the Cauca Government Secretariat (regional government)

- Led the development team across every stage, from requirements gathering to formal client handover.
- Built the frontend (React + Leaflet) and backend (Spring Boot + PostgreSQL) of a geo-referenced security-incident management system under a hexagonal, microservices architecture.
- Implemented role-based authentication, interactive dashboards with heat maps, and exportable reports (PDF / Excel), with CI/CD on GitHub Actions.

Tech: React, Leaflet, Spring Boot, Java, PostgreSQL, Docker, GitHub Actions

2026

AIMO — Full-Stack & AI Developer
Conversational emotional-support assistant for university students

- Built a cascading multi-agent system with LLMs (LLaMA 3.3-70B, GPT-4, Claude Sonnet 4.5) using the *LLM-as-a-Judge* methodology to assess empathy in real time.
- Developed the backend (Python + Flask) integrating multiple AI providers (Groq, OpenAI, AWS Bedrock) and the frontend (React + Vite).
- Deployed the full-stack application to production (Vercel + Railway).

Tech: Python, Flask, React, LLMs, Groq, OpenAI, AWS Bedrock

2026 • aimo-amber.vercel.app

Personal Portfolio
Editorial personal site with full-page navigation and animations

- Designed and built a portfolio with full-page navigation, slideshow-style transitions, bilingual support (ES / EN), and multiple color themes.

Tech: Next.js 15, React 19, TypeScript, Tailwind CSS, Framer Motion

2026 • ana-sofia-arango.vercel.app

TECHNICAL SKILLS

Languages	Java, Python, TypeScript, JavaScript, C#, SQL, HTML5, CSS3
Frontend	React, Next.js, Angular, React Native, Tailwind CSS, Leaflet
Backend	Spring Boot, Flask, Node.js, ASP.NET Core, REST APIs
AI / Data	LLMs, multi-agent systems, prompt engineering, TensorFlow, Scikit-learn, OpenAI, AWS Bedrock, Groq
Databases	PostgreSQL, MySQL, MongoDB, Oracle, Entity Framework
Cloud & DevOps	AWS, Vercel, Railway, Docker, Git, GitHub Actions
Architecture	Microservices, hexagonal, onion, atomic design
Tools	Git, GitHub, Figma

CERTIFICATIONS

NVIDIA DLI
Rapid Application Development with LLMs • Building LLM Applications with Prompt Engineering • Generative AI Explained • Transformer-Based NLP • Getting Started with Deep Learning • Accelerating End-to-End Data Science Workflows

Cisco Academy
CCNA: Introduction to Networks • CCNA: Switching, Routing & Wireless Essentials • Junior Cybersecurity Analyst Career Path • Introduction to Cybersecurity

LANGUAGES

Spanish	Native
English	Intermediate (B1-B2) — fluent technical reading and writing
